# **OUTCOME ASSESSMENT TESTING SUMMARY REPORT**

The following **OUTCOME ASSESSMENT** was created in order for your doctor to better understand the nature and extent of your injuries. It provides research-validated, useful information crucial in determining a correct and optimal treatment plan. The outcome assessment testing tools are designed to establish baseline pain level, functional status, and other relevant measures. In addition, it documents progress. Specifically, it documents the response of patients to the medical care they are receiving and helps guide in the clinical decision-making process.

# **Shoulder Pain and Disability Index (SPADI)**

Please place a mark on the line that best represents your experience during the last week attributable to your shoulder problem.

#### Pain scale

#### How severe is your pain?

Circle the number that best describes your pain where: 0 = no pain and 10 = the worst pain imaginable.

At its worst?	0	1	2	3	4	5	6	7	8	9	10
When lying on the involved side?	0	1	2	3	4	5	6	7	8	9	10
Reaching for something on a high shelf?	0	1	2	3	4	5	6	7	8	9	10
